Tungsten Carbide Blast Nozzle

The TYP-5 (5/16-inch orifice) tungsten carbide nozzle is ideal for most blasting jobs.

Common Applications

- General cleaning of light metals, fiberglass, stainless steel, glass, aluminum and composites
- Deflashing plastic parts
- Paint stripping of powder coated parts, ink wells, golf balls, paint guns, racks, hooks, vehicles, ground support equipment, aircraft
- Cleaning and stripping of molds, tooling, automotive and aircraft engine components, wheels, turbines, semi-conductors, silk screen frames
- Special finishes for sculpture and artwork

*This cabinet is not designed for use with soda media.

Bicarbonate of soda, a non-aggressive, single-use media, requires unique equipment considerations. Several Aerolyte cabinet models are available for light-duty or high-production soda blasting. Consult your local authorized Clemco distributor.

DUST COLLECTORS

ZERO RP dust collectors trap 99.7% of dust particles down to 0.5 micron.

CDC-1

CDC-1 dust collectors come in three sizes; 300 cfm, 600 cfm, and 900 cfm. The cartridges are pulse-cleaned by pressing the manual pulse-valve to clear the filter of dust. Dimensions are 34" wide, 42" deep (with motor housing) and 94" high. MAH is 11 ft for the 300 cfm and 600 cfm units and 12-1/2 ft for the 900 cfm unit.

RPC-2

The RPC-2 has two cartridges which provide 470 sq ft of filter area. The cartridges are automatically pulse-cleaned for maximum filter efficiency. Dimensions are: 56" wide (with motor housing) by 30" deep by 67.5" high. The MAH for the RPC-2 series is 8 ft 10 inches.

RPH-2

The RPH-2 has a filter area of 470 sq ft; the RPH-3 has a 705 sq ft filter area. Both have a built-in hopper to minimize dust-handling. At each pulse, dust falls first into the hopper and then into a disposal drum or bag beneath it. The operator never handles the dust—an important safety feature. RPH dust collector dimensions are: 56" wide (with motor housing) by 36" deep by 115" high. The RPH is designed to allow outdoor installation. The MAH for the RPH collectors is 15 ft 2 inch.

ISO 9001 certified. Clemco is committed to continuous product improvement. Specifications are subject to change without notice.

BLAST/ RECLAIM SYSTEM

Our exclusive media reclaimers continuously extract dust and debris and return usable media to the blast system.

The reclaimer, mounted atop the pressure vessel, automatically refills the blast system with clean, recycled media each time the foot pedal is released.
