BNP 160 Tumble Basket Blast Cabinet

A production suction-type blast cleaning machine with a small footprint, The BNP-160 fits nicely in the work flow stream helping to eliminate unnecessary handling or worker movement. For small occasional batches or use up to 8 hours per day, the BNP-160 features a 2-gallon tumble basket for processing up to 25 pound loads. It has reclaimer for media cleaning and reverse-pulse collector, which pulses with every basket revolution. The unit is equipped with easy set-it and forget-it 60 minute timer. The BNP-160 is suitable for most fine mesh blast media.

Applications:

- Cleaning castings
- Finishing steel, stainless steel, aluminum, brass and other metals
- Removing burrs, parting lines, defects from castings and injection-molded parts
- Shot peening springs, journals, bearings, valve stems, tools for strength enhancement and reliability
- General cleaning and surface preparation
